

YOUR ORGANISATION, OUR SOLUTION

YOUR RECRUITMENT PARTNER IN ENGINEERING

Thanks to its focus on innovation, many scientific research institutes and open markets, the Netherlands scores high as a knowledge economy. With the success of 'Brainport Eindhoven' garnering such accolades as 'the smartest square kilometre in Europe' and 'most patent applications per capita', many other technology regions in the Netherlands have followed suit. More and more innovations have grown into worldwide successes! These developments call for talented individuals with a passion for technology. The recruitment of highly qualified technical professionals, both in the Netherlands and abroad, is our core activity. Our network consists of a wide range of ambitious professionals, from starting engineers to experienced specialists, in a variety of disciplines. We would be happy to help you determine how to satisfy your recruitment needs.

Proven success

Over the past years, we have secured a strong position in the technology sector and built a large network in various disciplines, including high tech, automotive, marine, oil & gas and manufacturing. Our structured and personal approach has enabled us to establish lasting partnerships with our clients. What's more, we are the preferred supplier for a number of high-profile multinationals and suppliers. Thanks to our talent pools, we can provide the solution to your recruitment needs in a very short span of time. The specialist who can start tomorrow was already consulted yesterday!

Extensive reach

Through an optimal mix of media, search and our large network, we are capable of attracting and retaining Dutch and international candidates who meet and exceed your expectations. We have hundreds of professionals seconded to innovative companies throughout the Netherlands. They are familiar with the temporary nature of your assignments and are excellent at responding to specific issues within your organisation.

Focus on you

Specialised consultants

An engaged team of specialised consultants lies at the core of our current success. With an average of over five years' experience in employment services and/or an extensive knowledge of technical disciplines, our consultants are fully equipped to address your recruitment needs. We draw on our knowledge and focus to translate your recruitment needs into a suitable solution and present you with the best candidates on the market.

Highly developed professionals

Our professionals are encouraged to participate in profession-related training courses or training programmes. In addition to personal contact, we find that targeted ongoing development is essential for excelling. A coach supports our professionals in improving their competencies. Together, they take stock of the steps that need to be taken for personal development. These steps are used to determine specific training goals and the further training process. This satisfies the quality demands of both your organisation and our professionals and ensures that they will provide even greater value to your organisation.

Flexible and clear agreements

We would be happy to draw up a proposal detailing your recruitment needs and our approach. Our working method is characterised by speed combined with quality and flexibility. If you would like to extend or terminate a contract early, we would be happy to help you reach the right solution. Our greatest aim is absolute satisfaction. Regular consultation ensures optimal collaboration. We strive to maintain a lasting and transparent relationship.
